

ANNUAL COUNCIL AND SCHOOL MEETINGS

There was not the usual large crowd of representatives at the annual meeting of the Town Council and School trustees last Friday night, which was held at the school. The committee men who worked so assiduously all year. However, as the financial part was the best in many years, they may possibly be one of the reasons for the lack of interest.

The Mayor called the meeting to order at 8:10 and in his opening remarks expressed the thanks of the Council to the Commercial Hotel Association for providing a free show on Halloween. He mentioned that in view of all the town records he had been taken and the local institutions which had been by the hand would in future be stored in the town office in a cupboard specially built for the purpose.

The town program for 1926 had not yet been completed. The re-valuation of the office and pump house had been completed. The proceeds of the power house sale had not been paid over (the Council had been told that the proceeds in special account to be used for this purpose during 1927).

An inspection of the water tank had been made and sufficient work had been provided in the extension for the year to allow of a thorough overhaul.

The question of irrigation for the year was still in the hands of the ratepayers themselves and further action would depend upon their action in this respect.

He concluded by thanking the ratepayers for the opportunity given him to give him of serving on the Council. The secretary then read the minutes of the previous annual meeting. Messrs. Anderson and Murray moved: That the minutes be accepted as read.—Carried.

The auditor's report was then read. Discussion was invited on the financial statement. The auditor then read the minutes of the previous meeting. Messrs. Anderson and Murray moved: That the minutes be accepted as read.—Carried.

He stated that a considerable amount of work had been done during the year. In July all the side walks had been overhauled and put in good condition. The lumber used for this purpose was almost entirely taken from the village of the new house building. A number of places in the roadway, notably that part of the main highway from the school to south of the Catholic church were graded and brought up to standard. At the same time the new pavements were constructed to remove water more rapidly from the street and prevent the water from freezing. The lumber used in the construction of the culverts was also taken from the village of the new house building.

A large quantity of chinders and gravel had been placed on the crosswalks of many of which were in bad condition.

A thirty-six inch corrugated culvert was installed on Third Avenue and the main highway from the school to the place of the original culvert which was in a low place of the main highway and was in a very bad condition and causing considerable trouble to the heavy grain haulers in the fall.

Other work during the year was the construction of the new house building of a handcart at the Commercial Hotel, flushing and cleaning the sewers and putting the water main in shape to handle the tourists' traffic.

Messrs. McConnel and Murray moved: That the report be accepted as read.—Carried.

WATERWORKS COMMITTEE

During the year the water supply was maintained at full capacity at a time dropping below 50,000 gallons a day. No repairs had been made to the meter equipment which continued to maintain a high standard of efficiency.

DISPATCH RIDERS AND RIFLE IN LAZEST MIX FILM

BATTLE TOWN BOARDS AND BURNING SHELLS MAKE VIVID PICTURE

A vivid picture of modern war, and the wreckage of a abandoned village in France, is shown in Tom Mix's latest starring vehicle, "The Charge of Light," shown at the Glenlivet Community Hall, Friday nights.

In this 3-act Fox Film, Tom Mix, as a cavalry captain, a ranchman and a cavalry leader, is shown as he has gone as the captain of a troop of cowboys here he finds, however, that he must change from horse to motorcycle and some of the most gripping scenes are filmed when Tom and his body-fighting over shell torn roads with burning airplanes towering the scene.

ALBERTA WHEAT POOL NOTES

J. J. Jene, Stang, a well-known farmer of Claresholm district, was elected as director by the delegates from this district at a meeting held in the Wheat Pool office, Mr. Stang succeeds Hon. O. M. McPherson, who resigned when taking over the provincial portfolio of Public Works. The new director however, declined 14 miles east of Claresholm in 1924. He now farms two sections of land there.

Present Wheat Pool contracts expire with the handling of the 1927 crop, and new contracts are being prepared for another sign-up. Saskatchewan and Manitoba are making similar plans. The present contract is for the handling of the 1927 crop, and new contracts are being prepared for another sign-up. Saskatchewan and Manitoba are making similar plans. The present contract is for the handling of the 1927 crop, and new contracts are being prepared for another sign-up. Saskatchewan and Manitoba are making similar plans.

COMING EVENTS

Feb. 4—Bassano Shiks vs. Glenlivet Shiks at Glenlivet.

Feb. 4—Hard time dance at McDowbrough Community Hall.

Feb. 11—St. Valentine's Dance in the Community Hall by Glenlivet Women's Institute.

Feb. 15—A. B. Bordenick's Auction, 150-150.

Feb. 16—Fire Brigade Annual Meeting and Banquet.

Everybody is going to the Hard Time dance in the McDowbrough Hall Friday night—yours truly.

The Glenlivet Women's Institute ladies are making great preparation for their St. Valentine's Dance, on Friday, Feb. 11th. And will deliver in the Community Hall in grand style for the occasion.

The net proceeds of this dance will be donated to the Glenlivet Women's Institute and it is hoped to prove one of the best the Institute has ever had and the very best of the season. The Women's Auxiliary of St. Andrew's Church is to supply the supper, which will allow the Institute ladies an opportunity to make the dance more enjoyable. All are invited.

BIG DAIRY CONVENTION

Dairymen from all over Western Canada will gather at Edmonton during the week of February eighth, for the Western Canada Dairy Convention which is expected to be the largest of its kind ever held. Special exhibits are being prepared for this convention, and prominent speakers will deliver addresses. Delegates will be present from the four western provinces. It is just thirty years ago that the first move was made by government authorities to assist in the establishment of the dairy industry in the West. The history of the development of the industry in that period will be one of the interesting topics of the convention.

Judge—"What do you mean by hitting the time in the nose?"

Priest—"It's like this, your honor. I meant to hit him in the eye, but he dodged."

NOTICE

GEORGE S. TOMALIN DECEASED

All persons having any claim against George S. Tomalin deceased, late of Glenlivet and Calgary, Alberta, who died in St. Thomas' Hospital, London, England, on the 18th day of October 1926, are requested to forward full particulars of the same verified by Statutory Declaration, to me, the undersigned, on or before the 15th day of February 1927.

Dated at Calgary this 1st day of February 1927.

FRANK E. EATON, K. C.
Clarence Block,
122 8th Avenue West,
Calgary.

Canada and Japan

Dr. H. M. Turp, president of the University of Alberta and chairman of the National Research Council of Canada, represented Canada at the conference of all commonwealth nations in London, which was held for five months ago in Japan, and in a recent address before the Canadian Club of Edmonton he gave some of his impressions of Japan and its people. Dr. Turp's highly encouraging and interesting address attracted much interest from the English on the part of Canadians.

In view of the fact that Dr. Turp, president of the University of Alberta and chairman of the National Research Council of Canada, represented Canada at the conference of all commonwealth nations in London, which was held for five months ago in Japan, and in a recent address before the Canadian Club of Edmonton he gave some of his impressions of Japan and its people. Dr. Turp's highly encouraging and interesting address attracted much interest from the English on the part of Canadians.

Japan is frequently referred to as the Great Britain of the Pacific and the description is apt. Not only is there an analogy as noted in the present paragraph, but Japan, like Britain, has developed a large and growing maritime and a vigorous effective competition in the markets of the Pacific. In another respect Japan is resembling British Canada. It is an island, not a continent, with other lands, excepting the Philippines, all of them, and thus rendering the finished product easier in the very country from which the raw materials were imported.

For example, Japan is importing raw cotton from the United States, and is doing it, and selling the manufactured articles in the United States in competition with American and British manufactures after paying heavy freight charges overseas.

In the first ten months of last year Japan imported forty million more barrels of wheat than in the corresponding period of the previous year. Their mills are now expected to grind about three million more bushels of wheat than last year, but for export.

From Japan to Tokyo is just as conveniently promoting its export trade and Japan has much more reason to advance balance of trade, as Canadians are in respect to this Dominion. The Japanese realize that they are not the least quantity of raw materials, especially the Philippines, all of them, and thus rendering the finished product easier in the very country from which the raw materials were imported.

Japan then does not of the British Empire. The English language is taught in all the schools, and realizing that English is, and can be an interesting career, will be the language of commerce, Japan is very much encouraging its people to learn it so that within a generation or two every educated person in Japan will have a command of the language. Every year, too, the highest prizes from Japanese universities are awarded to the student who writes the most in the area and chooses that the best thought and the latest from his own mind.

Canada has a golden opportunity for the development of trade and commerce with Japan on a truly gigantic scale. The Dominion has for sale an abundance of many of the things which Japan lacks and must buy. In British people there is a steadily feeling for the two countries have a common area. The Pacific with links of communication already established, the time exists for the people of Canada to begin to do it off shore, as it is to be taken of the opportunities available in Japan and the Orient as a whole.

Canada is a young, large, and undeveloped country. Japan is an old and rich, a nation under one ruling dynasty, during long hundreds of years. Japan, the "Land of the Rising Sun," the land of the present Emperor has ruled over Japan for more than 2,000 years. Japan is a small country, densely populated. It is fully developed and highly industrialized. Its people are immensely patriotic, of high order of intelligence, and very prompt. To be exact that Japanese are observed with a feeling of respect. The Japanese are a people who will not be taken by the hand. Japanese Canadians will have to be business with Japan as with Canada. It is not a matter of a few years, but of a few even second order products, and to regard that country as a dumping ground for what cannot be sold elsewhere. Japan will not be so treated. It must be given to what we have to offer.

If Canadians generally learn to appreciate life and are accordingly, there is hardly any limit that can be placed on the future trade between the two countries. The trade between Canada and Japan is a rich source.

By the London, it is known as the Bastille of the...

Guests from Russia Constables of Prison Life Under Czar
 To show the present generation the "prison conditions of prison life under the Czar," the Soviet authorities have transferred the historic stone fortress and prison of the Russian Czar to a public institution. The stone cell which from 1875 was the scene of the execution of the Czar, and the dungeons in which all political prisoners of the last several years of the Russian Czar were confined to their medieval prison.

The St. Petersburg fortress, in a way, has any other kind of tool for more than 200 years. It is to tell the story of the Russian Czar.

Children Cry for

FLETCHER'S CASORIA

MOTHER—Fletcher's Casoria is a pleasant, harmless substitute for Castor Oil, for babies, teething children, and nursing babies, especially prepared for infants and children of all ages.

To avoid imitations, always look for the signature of Dr. J. C. Fletcher, and avoid imitations on each package. Physicians everywhere recommend it.

Half Million Still Needed

Parliament asked for Further Sum for Home Bank Relief

Parliament is to be asked, in view of a survey, to add a million dollars for the relief of Home Bank relief. The survey, which was already being voted and disbursed in payments to all debtors for some time, has been found to be having an impact on the loan and who must, although they were

All the money asked for Parliament has been expended and there are still debts, including half a million dollars, which the balance of the survey, which was already being voted and disbursed in payments to all debtors for some time, has been found to be having an impact on the loan and who must, although they were

Their holdings are prepared to make a strong recommendation to the Dominion government in connection with those claims, and will ask Parliament to vote the money. No new claims, however, will be received at the time now now expected.

There is something new in Scotland that has made it known for nearly 80 years past. It is the fact that the survey, which was already being voted and disbursed in payments to all debtors for some time, has been found to be having an impact on the loan and who must, although they were

Scottish Mine Slaves

In Seventeenth Century Mines All Operated by Slave Labor

No longer ago than the seventeenth century, according to history, Scottish mines were operated by slave labor.

In those days, miners, both men and women, were bound for life to the pits in which they worked. They were usually transferred with the collier, when these were sold to a new owner, as part of the property. The ordinary state of bondage, maintained by Scots law in London, continued for two centuries.

Even for the miners, there was no type of estate, for as soon as they started to work they were "sold" to the pit for the rest of their lives. The miners, however, were the property of their own pit, and they remained slaves as invariable for their children also.

Some infants were sold to the masters at the time of their baptism. In the process, the mother was sold to the master of the mine, and from that moment the babe was bound for life to the pit.

If any miner, raised by a better sense of humanity, tried to gain his freedom, he was sold to the master. In the process, the mother was sold to the master of the mine, and from that moment the babe was bound for life to the pit.

If any miner, raised by a better sense of humanity, tried to gain his freedom, he was sold to the master. In the process, the mother was sold to the master of the mine, and from that moment the babe was bound for life to the pit.

BACK UP NEWSPAPERS

Frequently we are so closely associated with institutions or commodity that we do not appreciate their worth. This applies in general to newspapers. Every city, town and hamlet has its newspapers. Even sometimes a few houses and a store and garage at a "who place" in the route, constitute excuse enough for the starting of a newspaper and not infrequently that wide place in the road becomes a real town and when it does one may rest assured that that newspaper that seemed to have had no excuse for beginning life had a very important part to play in the community's unexpected development.

So it is all along the line of progress. No city ever gets very far without the sincere cooperation of newspapers. Yet no institution in a city ever gets less thanks or receive more abuse.

Probably no other one thing is a better index to a town than its weekly publications. Very often that is about all the stranger has to go by in making up his mind about a community. If the newspaper that falls into his hands is a bright looking sheet, full of advertisements and has a prosperous air, the stranger is certain to judge that it was published in a live, progressive town.

Those who read their weekly newspapers and carelessly throw them aside, overlook the fact that they are not doing all for their town that they can. If those newspapers instead of being destroyed were placed in wrappers and mailed from time to time to friends and relatives at a distance the good that could be accomplished would soon be reflected in the town's growth.

Board of Trade are frequently blamed for not getting out more boost literature to be sent abroad. Those who raise these complaints do a great deal themselves by sending out the literature that comes into their own hands in the form of local periodicals. Rest assured there is no business individual in a town more interested in the growth of his community than is the editor or publisher, for as the town grows he grows.

THIS TIME MAY COME

The time may come.

When someone will not be extolling the "good old days."

When oddsters will not be viewing with alarm the goings-on among the young people.

When the comic sheets will not pretend that husbands are heckled.

When a reporter, detective and a parson on the stage, or in the movies will hsemble a reporter, a detective and a parson in real life.

When popular magazines will think up some new way to adorn their covers without glorifying the girl.

When a man will work as hard as he leads his wife and his friends to think he works.

When a "business conference" means a business conference and not a game of golf.

When cynics will not be knocking the church and the church will not be knocking the world.

When an employe admits he is being paid all he's worth.

When professional reformers admit that society is O. K. and voluntarily quit their jobs.

When a man gives up his automobile and explains that he cannot afford one.

When somebody will not be prophesying that the world is coming to an end.

When suckers will not be stung by fake investments salesmen.

Yes, the time may come. But we don't expect to be a live to enjoy the millennial dawn!

MAN THE IMITATOR

In his humbler moments, when the deeds of angels and archangels are brought to his attention, man has been wont to call himself but a worm of the dust; but now? French scientist, Lucien Cuendet, declares man is but an imitator of the lower forms of animal life, and that many of his most boasted inventions have been used by the bug for ages. To make the humiliation of man complete, the scientist says he is but a poor imitator at that, and the inventions of insects and animals are always more perfect and worked out with more detail than those of man.

Even the camouflage of the war is as old as the hills among the lower animals, he says, and the grasshopper has used a torpedo tube from time immemorial to plant its eggs low in the ground. Even the patented fastener only invented by man about forty years ago, has been used by the cuttlefish to button its outer skin on ever since there has been a cuttlefish, while the file, the anchor, the rat, the groove, and the sort of dovetailing have always been used by the lower animals. The invention of musical instruments is stolen from the insects.

There is just so much for everybody. If you do your share, there is more for your creditors.

HOCKEY

(Continued from page 1.)

made wonderful saves. Gleichen never seemed to be able to get started, probably because they were checked too close for the Molitor. Hat puck covers were great luckchekers at when the first period ended no goal were counted.

Shortly after the second period began Gleichen got the puck into the Molitor net but the referee would not allow the goal to count claiming it an offside, and everybody wants to know why he did not ring the bell before the puck was in the net instead of afterwards. All figured the referee had plenty of time to ring before the offside was committed.

During the first part of the second period the Monarchs played very cautiously and Gleichen failed to take advantage of it. The referee of the second period Monarchs had two counters and they also made one in the third. Gleichen made them only counter in the last few minutes of the game.

The Monarchs looked all evening for breaks in the game and they got it once. Every time a Gleichen man was penalized the Monarchs seized the opportunity to crowd down on the Gleichen net and succeeded in scoring once before the referee blew the whistle.

But Gleichen showed poor management when the game boys had a play doctoring during the game, they would stick to the three man defense instead of putting the whole forward line into action and when Medicine Hat team had man on the fence the boys from the game town had the art of killing time till their men came out, down to referee.

Gleichen failed to utilize the ideas of the game city boys. The referee being a Medicine Hat man was severely criticized by the crowd in the last five minutes of play, for hanging onto the puck too long when he called offside as in the last five minutes the Gleichen boys crowded the Monarchs back on their own goal and the game became very fast.

Gleichen's combination work was poor all through the game but the defense was great and did wonders. The Monarchs played like a well oiled machine. Gleichen never going property and it certainly was an "off" night for them. The solid boys put in the poorest game we have seen them play this winter. Their shooting was anything but accurate and if they had been shooting well their point accuracy the result of this game would have been a different story.

Gleichen shot a few inches while numerous times and the goal tender was on the opposite side of the net. Medicine Hat save were good and they were able to keep up the pace while Gleichen did not play the subs that were equal to the boys on the ice. Al Wilson, the Gleichen goalie, seemed to be the only Gleichen player who was "on" that night and he saved many a score at his charge.

The game was exceedingly close and no dirty work whatever was displayed. The penalties handed out were for tripping. The only Gleichen goal was made by Bob Brown. The lineup was as follows:

Medicine Hat Monarchs—Goal: Woodhouse; defense, Bond and Knight; forwards, McKay, Holley, Nason Scott, Horne, Holley. 2nd line—Goal: Al Wilson; defense, O. Wilson and Wright; forwards, Brown, Lyon, McKay Taylor and McMillan.

Referee—Dr. P. H. McNickel, of Medicine Hat.

GOVERNOR GENERAL
COMING TO ALBERTA

Viscount Willingdon, governor general, will pay a visit to Alberta in the middle of April. Arrangements are being made for his visit by governmental and city authorities in Calgary and Edmonton. The University of Alberta will confer an honorary degree upon him during his visit.

HEAVY GASOLINE PRODUCTION

Over 200,000 barrels of 72 degree natural gasoline were produced at Rosedale No. 4 well in the Turner Valley, east of Calgary, during 1926 and the record month being January with a production of 20,172 barrels, while the low record of 10,447 barrels were produced in December.

There are now three other producing wells in the Turner Valley the latest to come in being the Macdonald No. 4, which came totalling near by nine million cubic feet per day.

HAIR DRESSING AND MARCELLING

Miss A Downey will be at the Gleichen Hotel from 4 p. m. each Wednesday to 2 p. m. on Thursday.
